# Texas Agricultural Statistics

Support and cooperation from Texas farmers, ranchers and agribusinesses are the keys to accurate, reliable agricultural statistics. The National Agricultural Statistics, Texas Field Office appreciates the many individuals who provided the survey data which were the foundation for the estimates in this summary. We hope it will be a useful source of information to everyone involved in agriculture.

Texas Agricultural Statistics (2004) provides data on cash receipts, prices, livestock and livestock products, field crops, major vegetables, citrus fruits, peaches and pecans. The two most recent years of district and county level data are included for all major crop and livestock items.

The funding for the collection of county-level data was provided by the Texas Legislature through a cooperative program between the Texas Department of Agriculture and the United States Department of Agriculture, National Agricultural Statistics Service, Texas Field Office.

**STATE OF TEXAS**  
**OFFICE OF THE GOVERNOR**

August 30, 2005

**Greetings:**

As a fifth-generation Texan who grew up on a farm in West Texas, and having had the honor of being Texas' commissioner of agriculture, I fully understand the challenges of marshalling nature's elements to produce a marketable product. To all involved in the agriculture industry throughout Texas, I say thank you, and that yours is a job well done.

Texas is a national leader in agriculture, which continues to serve as an important mainstay and major employment sector of our economy.

It is through your commitment to excellence that Texas prospers, remaining the nation's leader in the production of cotton, cattle, sheep, goats, wool, mohair and hay. And, from the flat plains of the Texas Panhandle where cotton is king, to the San Antonio-Winter Garden where a significant percentage of our nation's fruit is produced, the Lone Star State is home to ranches and farms of all sizes and kinds.

Through the efforts of the Texas Agricultural Statistics Service and the Texas Department of Agriculture, invaluable statistical information is maintained and made accessible. Recognized for its excellence and utility, the information gathered lies at the foundation of industry-wide successes. With a state as large and diverse as Texas, this is no easy task. I extend my gratitude to the individuals who work to ensure such excellence.

Sincerely,

A handwritten signature in black ink that reads "Rick Perry". The signature is written in a cursive, slightly slanted style.

Rick Perry  
Governor

SUSAN COMBS, COMMISSIONER

**TEXAS DEPARTMENT  
OF AGRICULTURE**

P.O. Box 12847  
AUSTIN, TEXAS 78711  
(512) 463-7476  
FAX (888) 223-8861  
FOR THE HEARING IMPAIRED:  
1-800-735-2988 (VOICE)  
1-800-735-2989 (TTY)  
[www.agr.state.tx.us](http://www.agr.state.tx.us)

To My Fellow Texans:

Across the world, consumers know to look for Texas agricultural products. Texas has a unique climate and culture that make it ideal for a wide range of different agricultural products. From tasty Texas beef to crunchy Texas pecans to durable Texas cotton, the Lone Star State offers the world a diverse cornucopia of food, horticulture and fiber products. As Texas Agriculture Commissioner, one of my most important duties is to make sure the bounty of Texas agriculture and the size and importance of the industry receive the attention and credit it is due.

One of the most vital resources Texas Department of Agriculture professionals use in their work is the book you now hold in your hand. The 2004 Texas Agricultural Statistics bulletin is the best source for information about the second largest industry in Texas. Inside you will find the story of Texas agriculture over the last year in the form of hard statistics and facts.

Texas agricultural producers faced down a number of challenges and hardships in 2004 to create a banner year for the thousands of Texans that depend on agriculture for their livelihood. You don't have to take my word about the importance of the industry and the new heights of success it achieved in 2004. Numbers tell the story, and that's what the National Agricultural Statistics Service, Texas Field Office is all about.

Texas Field Office is an invaluable partner to all Texans who depend on agriculture – producers, consumers and retailers. The professionals at USDA, NASS, Texas Field Office and their work are powerful assets for our state, and we are all grateful for their dedication to agriculture and for providing the important information compiled in this publication.

Sincerely,

Susan Combs  
Commissioner

*Making Texas the nation's  
leader in agriculture, while  
promoting excellence in  
children's nutrition, rural  
economic development and  
providing efficient and  
extraordinary service.*

**A Message from the Director:**

Texas agriculture producers provide people of the U.S. and the world a consistent supply of quality food and fiber products. Agriculture production during 2004 was no exception as producers proved agriculture's importance in Texas with over \$16.5 billion in cash receipts, up 8 percent from 2003. The Texas Field Office of USDA's National Agricultural Statistics Service is proud to serve the agriculture industry by providing the necessary data about the crop and livestock production here in Texas. This publication contains a compilation of statistics to help improve the quality of agriculture marketing and to support efforts in establishing State and national policies.

This bulletin is provided in cooperation with the Texas Department of Agriculture. While we take tremendous pride in providing this service, we are also mindful of the cooperation provided by the thousands of farmers, ranchers, and agribusiness operators that provide the raw data for this publication. We owe each and every individual a large "Thank You".

I also want to take this opportunity to assure our data reporters that the individual information they provide is protected for Federal Law, Title 7, U.S. Code. These individual data are only used to produce the statistical summaries you can find on the following pages. This law protects the individual information provided from being disclosed to any other person, business or organization - public or private.

As I or staff from our office travel around Texas, as well as talking to many of you over the phone, I must say that it is always a pleasure to visit with the agriculture producers of Texas. The feedback you provide to us on ways that the Texas Field Office of USDA's National Agricultural Statistics Service can provide better service is also appreciated. Our goal is to always be improving our products and services. After all, that's what we are here for - to be of service to agriculture.

Regards,

Robin O. Roark  
Director

# 2004 AGRICULTURAL SUMMARY

**January** began with very cold temperature across the state, especially the Plains and North Texas where temperatures plummeted to below zero in a few locations. Below average temperatures were also felt across the remainder of the state and even as far down as the Rio Grande Valley where thermometer readings approached freezing. During mid month, another front brought rain and snow to portions of the Panhandle and the South Plains. Further south, the snow turned to rain across Central Texas and portions of the Edwards Plateau. The Upper Coast and southern counties in East Texas received steady rain all month. Scattered showers also occurred in the Trans Pecos and the Coastal Bend regions. Small grains were suffering from moisture stress in many areas during early month, however some relief was noted in areas where rains fell. For many producers who were grazing their fields, the rains came too late to allow further grazing. Land preparation was active, especially in southern areas as spring planting was just around the corner. Supplemental feeding was heavy across the state as many small grain fields were grazed out. Sickness in livestock was prevalent due to the wide swing in temperatures. Range and pastures saw some relief in areas where rains fell, however many areas remained dry and pasture condition, continued to decline.

**February** began with heavy snow across the South Plains and North Central Texas, with as much as a foot accumulating over many locations. Further south, the snow turned to freezing rain and sleet resulting in hazardous conditions. The added moisture was welcomed by many small grain producers, however many other areas remained dry and small grains continued to suffer. By mid month, heavy rainfall was again reported in areas across East Texas, the Upper Coast, and portions of Central and South Texas. Small grain conditions improved in some areas as the result of the added moisture, however it was too late for some areas, and crop abandonment was common. Planting began in the Rio Grande Valley in mid to late month, however many areas of Central Texas remained too wet and planting was on hold. Range and pasture condition varied from too dry to too wet during late month. Many livestock herds were bogging in the mud and supplemental feeding was necessary in these areas as well as in extremely dry locations. while others were extremely dry.

**March** began with unusually wet conditions across the Panhandle and South Plains. High winds and hail crossed North Central Texas and the Edwards Plateau causing some tree and structural damage. East Texas, parts of South Texas and the Rio Grande Valley also received significant moisture early in the month. Small grain conditions improved dramatically nearly statewide. Some producers were able to return to grazing their fields. After weeks of wet fields, corn planting finally started on the Upper Coast and Central Texas. By month's end, nearly all seed corn was in the

ground in those regions. Planting was also completed in the Rio Grande Valley by mid month. Cotton planting in southern regions was delayed in the first half of the month, but moved along at a quick pace by month's end. Early planted cotton fields were emerging in portions of the Rio Grande Valley by month's end. Sorghum, rice and soybean planting had begun on the Upper Coast. Pastures in East Texas were slowly drying out. Supplemental feeding remained necessary as pasture green-up slowly moved northward. Many areas remained dry at the end of the month and forecast were not promising.

**April** began with above average rainfall across the majority of state. Rains with 1 to 3 inch accumulations were common, and 10 inch accumulations were reported in some central locations. Six inch accumulations were common in portions of the Plains and Coastal Bend during the month. High winds, hail, localized flooding and some tornadoes caused damage in portions of Central Texas and the Coastal Bend. The Panhandle experienced a hard freeze during mid month as temperature dipped down into the 20's. Some freeze damage was reported on small grains, however major damage was avoided. In other areas, small grains benefitted greatly from the increased moisture and what once was a sub par crop began to improve. Corn planting was completed in central areas and had started on the Panhandle as conditions allowed. Producers in Central Texas and the Upper Coast were planting cotton as soon as fields were dry enough. Replanting was necessary on some acres due to heavy rainfall after planting. Rio Grande Valley cotton was emerging and in good shape. Planting of other crops was ongoing from Central Texas southward. Hay cutting moved ahead in southern locations and supplemental feeding lessened in most areas. A few areas remained dry, and in these locations, pasture decline was ongoing and supplemental feeding remained necessary.

Heavy rains continued to fall over several regions in the month of **May**. Most locations in the Coastal Bend, Upper Coast, and East Texas received more than 6 inches of rain for the month. Isolated locations reported up to a 12 inches of precipitation. Most other regions experienced scattered showers and an occasional heavy downpour. Small grains progressed well across the majority of the state and harvest started in southern locations as fields dried. Powdery mildew and rust became a nuisance, especially in the central locations. Corn planting was completed on the Panhandle, and many fields had emerged with excellent stands. Fields in the Rio Grande Valley and Coastal Bend began to develop ears. Cotton in southern areas was developing behind schedule due to the lack of heat units associated with the long string of cloudy days. Most cotton on the South Plains was planted with good soil moisture reported. Some producers in drier locations were waiting for a rain to seed their crop. Sorghum was being planted on the South Plains at a fast pace. Some fields in the Coastal Bend and Upper Coast were disastered due to flooding. Pecan growers

were spraying for casebearers and anticipating a heavy nut set. Pastures and rangeland were in generally good shape, although a few drier locations in western regions and the Rio Grande Valley were in considerably poor shape. Supplemental feeding was very light in a majority of locations, however continued to be heavy in the few extremely dry locations.

It was the third wettest **June** on record in the state of Texas. The rains were unrelenting in nearly every corner of the state. Widespread areas of the Upper Coast, East Texas, Central and North Central Texas were deluged by 12 to 15 inches of rain. Most other regions received downpours of 6 to 8 inches of precipitation. Much of the rain was caused by a tropical disturbance off the southwest coast of Louisiana. While this disturbance directly affected eastern regions, the increased moisture from the system combined with stalled areas of low pressure to produce massive amounts of torrential rain showers for the entire state. Severe flooding occurred as creeks and rivers overflowed their banks leaving many fields and pastures underwater. Hail and high winds were reported across the Panhandle and North Central Texas. Harvest of small grains was slow with many delays in most areas and varying amounts of damage was reported from the storms. Some fields were completely destroyed by high winds and hail. There were also reports of head sprouting in the wettest locations. By month's end, corn harvest was ongoing in southern locations and replanting cotton occurred in a few areas of the Plains. Some damage was reported from winds in pecan orchards, but the wet weather was overwhelmingly favorable for the crop. Range and pastures were in generally good condition, however several dry areas remained and conditions by month's end were beginning to become severe. For the most part, good livestock conditions held steady, although some cattle herds were still tromping through the mud in wetter areas.

**July** was unusual to say the least. Instead of being generally hot and dry throughout the month, temperatures reached record lows in a few areas as the result of slow moving cool fronts. Rains fell across most areas especially during the last two weeks. Accumulations varied, but two to eight inch rains were common for many areas. High winds and hail damaged crops in a few locations, and some flooding was reported in other locations. As a result of the rainy period, soil moisture levels increased and crops that had been in danger of failure began to improve and show signs of normal growth and development. Range and pasture improvement was widespread by month's end. Water available for livestock was replenished in many areas.

**August** began with more rain in some areas. Many areas of the Plains experienced light to moderate rainfall, and damaging hail storms. Other areas further south received moderate rainfall, with accumulations up to four inches common. Unusually cool conditions continued throughout the month. Crop development

continued, however the cooler temperatures caused a lack of heat units that many crops needed to develop. Unusually cool conditions continued throughout the month. Harvest moved ahead, however was stalled at times due to frequent rains. Hay production increased across most areas and many producers were harvesting their third cutting by month's end. Range and pastures were rated as mostly adequate to very good across the majority of the state during the month. Livestock herds were in good shape and very little supplemental feeding was necessary. By late month, conditions became warmer and more average in many areas. Land preparation moved ahead on the Plains and planting of small grains was underway in many areas of Central and South Texas.

**September** began with mild and wet conditions across most areas of the state. Daytime high temperatures were lower than average, and some crops remained in need of adequate heat units. Hail storms damaged a few crops on the Plains, but no widespread damage was reported. Planting of small grains moved ahead as drying out occurred. Cotton harvest was active, however many delays occurred as drying out between rains was slow. By mid month, drier conditions returned, but temperatures remained cooler than normal. Coastal locations experienced a few strong storms and a few downpours delivered accumulations of up to five inches. Hurricane Ivan brought more rainfall late in the month to portions of East Texas and the Coastal bend. Planting of small grains moved ahead, but was slow as conditions across the state were generally wet. Pastures were in good condition in most areas as a result of the rainfall and cooler temperatures. Haying operations continued, but were much slower around the end of the month as fields were wet and drying out was slow. Livestock herds were in good condition and grazing was adequate across most areas.

**October** began with heavy rains across portions of the Plains, Trans Pecos, Edwards Plateau and Central Texas. The Southern Panhandle and South Plains areas received the brunt of storms and some locations received up to ten inches of rain. Planting and harvesting activity in these areas was generally on hold. By mid month, rains continued over the state and some flooding was reported in areas of the Edwards Plateau. In the few locations that remained dry, row crop harvest moved ahead slowly. Heat units continued to be needed across the Plains, especially for cotton development. Wet conditions were common during the later days of the month. Most days in mid month were cloudy to partly cloudy with intermittent to heavy rainfall across many areas of the state. Flooding and minor property damage was reported in some locations. A few areas became dry enough in late month to allow harvest to pick up, but widespread drying was needed. Range and pastures were in good shape for the winter months. Some supplemental feeding was necessary, but mostly due to excessively wet pastures. Pastures in some northern locations were showing signs of dormancy resulting from cool temperatures.

Wet conditions early in **November** continued to be undesirable for planting and harvesting. Heavy snowfall and near blizzard conditions crossed the Plains during the first week of the month. High winds caused varying degrees of damage to crops in the path of the snow storms. Further south, cold rains caused muddy conditions, and the first frost of the season occurred in many central locations. Conditions moderated somewhat by mid month, but harvest remained mostly on hold and dormancy in range and pastures continued to move southward. Some harvest occurred in the drier locations, but by late month conditions turned downward again with widespread rains, sleet and snow fell across the Plains. Heavy flooding was reported in a few areas with most damage occurring to roadways and fences. Harvest remained on hold in several areas of the state, and even with brief periods of sunshine, drying out was still needed. Range and pastures received the most benefit from the wet conditions, however some pasture damage occurred due to trampling of wet pastures.

In early **December**, sunshine returned and allowed harvest to resume, but many areas remained too wet and drying was still needed. Planting of small grains resumed in many areas, but the first hard freeze came to central locations and emergence was hampered by low temperatures. By mid month, conditions were again deteriorating as temperatures plummeted and record lows were reported in many locations. Remaining harvest was again stalled across the Plains and as a result, many producers would not complete harvest until well into the next year. Some areas across the northern part of the state received heavy snowfall and a few locations received snow for the first time in eighty plus years. Supplemental feeding increased with the extremes in conditions and some death loss in livestock herds was reported. The window for planting small grains ended, and several producers opted not to plant winter grains due the wet fall conditions.

<sup>1/</sup> A **farm** is defined as "any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year". Government payments are included in sales. Institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with their entire acreage enrolled in the Conservation Reserve Program, set-aside, or other government programs are considered operating farms. **Land in farms** is all land operated by farms during the year. It includes crop acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set-aside or commodity acreage programs. It excludes public, industrial and grazing association land and nonagricultural land. It excludes all land operated by establishments not qualifying as farms.

Source: Economic Research Service. USDA. <sup>1/</sup> Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the national economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>2/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. \* Revised.

<sup>1/</sup> The marketing season varies by crop: corn and Upland cotton, August through July; cottonseed, August through February; all hay and alfalfa hay, May through April. Marketing year average prices do not include government program payments or allowances for unredeemed loans and purchases by the government. <sup>2/</sup> Not published to avoid disclosure of individual firms. <sup>3/</sup> Cottonseed prices for missing months are not published due to small volume of sales. <sup>4/</sup> The all hay price is the weighted average price of the two groups, alfalfa and other hay.

2004 .....	6.16	758	805	1,782	43	45

<sup>1/</sup> Parity ratios are computed monthly by dividing the index of prices received for all farm products by the index of prices paid for Commodities and Services, Interest, Taxes and Wage Rates (both monthly indexes using a 1910-14 base). The annual parity ratio is a straight average of the twelve individual (January through December) monthly ratios. <sup>2/</sup> Adjusted to include government payments by multiplying column 2 by the ratio of [(100 + column 1 value)/100]. <sup>3/</sup> The adjusted ratio includes government payments to farmers. \* Revised.

2003 .....	7,767,111	9,882,050	79.50	102.00	7,872,092	18,591	7,890,683
2004 .....	7,333,786	9,207,800	86.50	123.00	7,989,786	21,066	8,010,852

<sup>1/</sup> Adjustments made for inshipments and changes in inventory. <sup>2/</sup> Excludes custom slaughter for use on farms where produced and interfarm sales within the state. <sup>3/</sup> Includes receipts from marketings and sale of farm slaughter.

**TEXAS FEEDER CATTLE SUPPLY: Inventory January 1, 2001-2005**

Item	2001	2002	2003	2004	2005
	<i>1,000 head</i>				
Total calves, steers and heifers <sup>1/</sup> .....	6,700	6,630	6,960	6,880	6,740
Calves, steers and heifers in feedlots <sup>2/</sup> .....	2,929	2,877	2,629	2,827	2,697
<b>Total feeder supply</b> .....	<b>3,771</b>	<b>3,753</b>	<b>4,331</b>	<b>4,053</b>	<b>4,043</b>

<sup>1/</sup> Excludes heifers for cow replacement. <sup>2/</sup> In lots with 1,000+ head capacity.

**TEXAS CATTLE ON FEED: Inventory January 1 and Annual Marketings, by Districts, 2003-2005 <sup>1/</sup>**

District	Cattle on feed inventory - January 1		Annual fed cattle marketings	
	2004	2005	2003	2004
	<i>1,000 head</i>			
District 1-N .....	2,325	2,252	5,009	4,715
District 1-S .....	219	165	415	415
District 2-N .....	74	80	128	152
District 7 .....	24	16	50	47
District 8-N .....	38	33	84	70
District 10-N .....	68	71	106	118
Other Districts .....	56	83	178	168
<b>STATE</b> .....	<b>2,830</b>	<b>2,700</b>	<b>5,970</b>	<b>5,685</b>

<sup>1/</sup> Districts 3, 2-S, 4, 5-N, 5-S, 6, 8-S, 9 and 10-S combined into "Other Districts" to avoid disclosing individual operations.

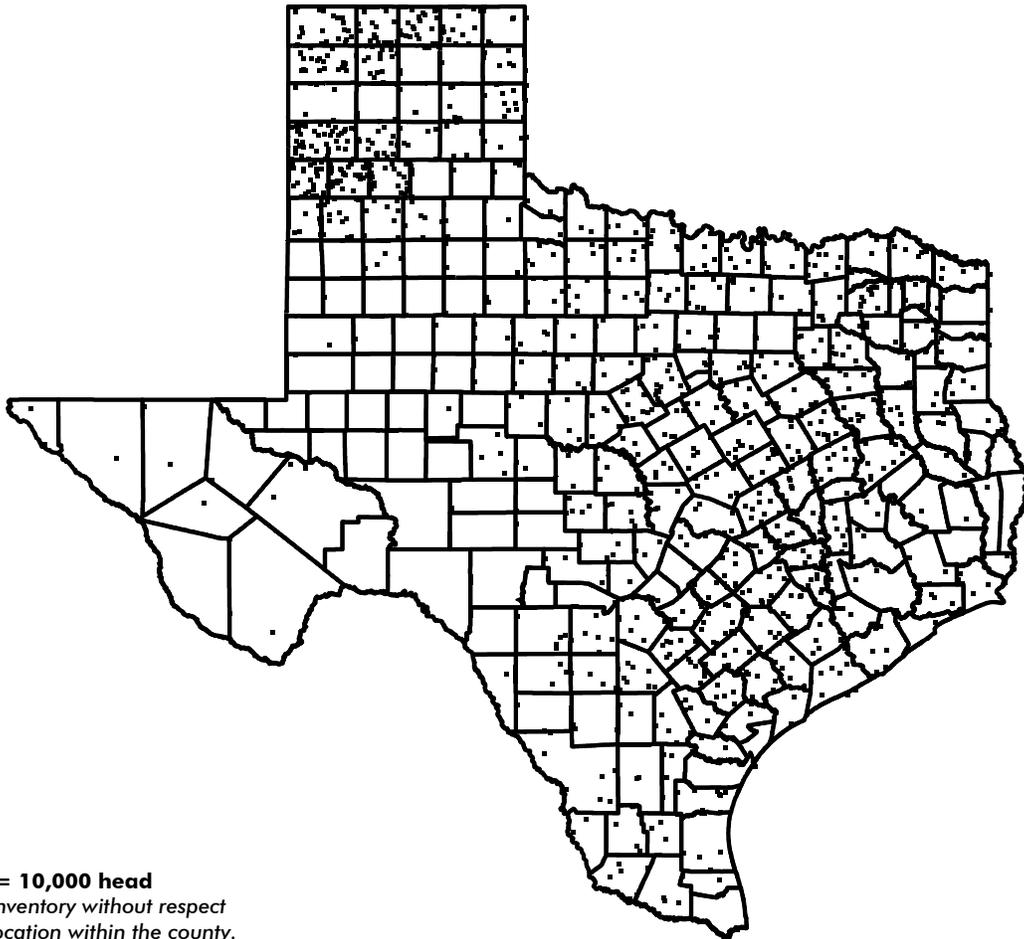

**TEXAS NUMBER OF CATTLE FEEDLOTS  
AND NUMBER OF GRAIN-FED CATTLE MARKETED, BY SIZE GROUPS, 2000-2004 <sup>1/</sup>**

Feedlot capacity (head)	2000	2001	2002	2003	2004
<b>1,000-3,999</b>					
Feedlots .....	12	12	11	12	11
Grain-fed cattle marketed .....	25	30	25	25	20
<b>4,000-15,999</b>					
Feedlots .....	44	41	41	40	39
Grain-fed cattle marketed .....	595	540	475	495	485
<b>16,000-31,999</b>					
Feedlots .....	32	36	35	33	32
Grain-fed cattle marketed .....	1,160	1,160	1,180	1,090	1,070
<b>32,000 and Over</b>					
Feedlots .....	49	49	49	49	49
Grain-fed cattle marketed .....	4,410	4,300	4,300	4,360	4,110
<b>TOTAL</b>					
Feedlots .....	137	138	136	134	131
Grain-fed cattle marketed .....	6,190	6,030	5,980	5,970	5,685

<sup>1/</sup> Number of feedlots with 1,000 head or more capacity is number of lots operating any time during year.

# TEXAS ALL CATTLE AND CALVES

January 1, 2005

1 dot = 10,000 head

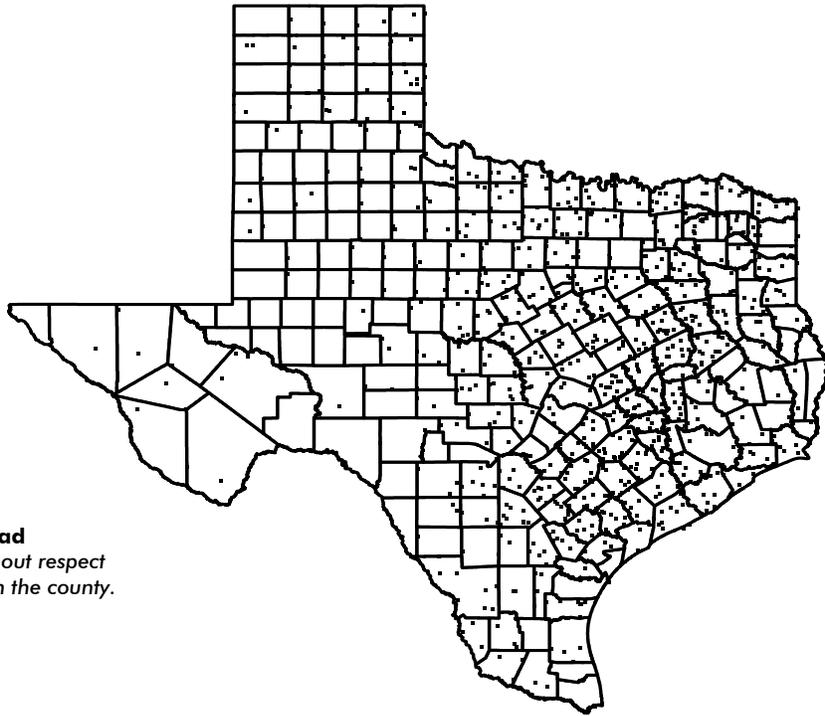

Dots indicate inventory without respect to geographic location within the county.

2004 .....	1.7	319	18,837	695	3.69	6,009	221.7

<sup>1/</sup> Average number during year excluding heifers that have not freshened. <sup>2/</sup> Excludes milk sucked by calves.

**TEXAS MILK AND CREAM: Marketings, Income and Value, 2000-2004**

Year	Combined marketings of milk and cream				Used for milk, cream and butter on operations where produced		Gross producer income <sup>3/</sup>	Value of milk produced <sup>2/ 4/</sup>
	Milk utilized	Average returns <sup>1/</sup>		Cash receipts from marketings	Milk utilized	Value <sup>2/</sup>		
		Per 100 pounds milk	Per pound milkfat					
	<i>Million lbs.</i>	<i>Dollars</i>		<i>1,000 dol.</i>	<i>Million lbs.</i>		<i>1,000 dollars</i>	
2000 ...	5,719	13.40	3.67	766,346	2	268	766,614	769,562
2001 ...	5,086	15.80	4.32	803,588	1	158	803,746	806,906
2002 ...	5,276	12.90	3.49	680,604	2	258	680,862	683,700
2003 ...	5,611	13.00	3.55	729,430	2	260	729,690	731,900
2004 ...	5,986	16.30	4.42	975,718	2	326	976,044	979,467

<sup>1/</sup> Cash receipts divided by milk for milkfat represented in combined marketings. <sup>2/</sup> Valued at average return per 100 pounds of milk in combined marketings of milk and cream. <sup>3/</sup> Cash receipts from marketings of milk and cream plus value of milk used for home consumption. <sup>4/</sup> Includes value of milk fed to calves.

**TEXAS MILK AND CREAM: Quantity Used and Marketed, Price and Cash Receipts, 2000-2004**

Year	Total milk produced	Milk used where produced		Milk marketed by producers		
		Fed to calves <sup>1/</sup>	Used for milk, cream and butter	Sold to plants and dealers as whole milk <sup>2/</sup>		
				Quantity	Price per 100 pounds	Cash receipts
		<i>Million pounds</i>		<i>Dollars</i>	<i>1,000 dollars</i>	
2000 .....	5,743	22	2	5,719	13.40	766,346
2001 .....	5,107	20	1	5,086	15.80	803,588
2002 .....	5,300	22	2	5,276	12.90	680,604
2003 .....	5,630	17	2	5,611	13.00	729,430
2004 .....	6,009	21	2	5,986	16.30	975,718

<sup>1/</sup> Excludes milk sucked by calves. <sup>2/</sup> Includes sales directly to consumers by producers who sell only milk from their herds; includes milk produced by institutional herds.

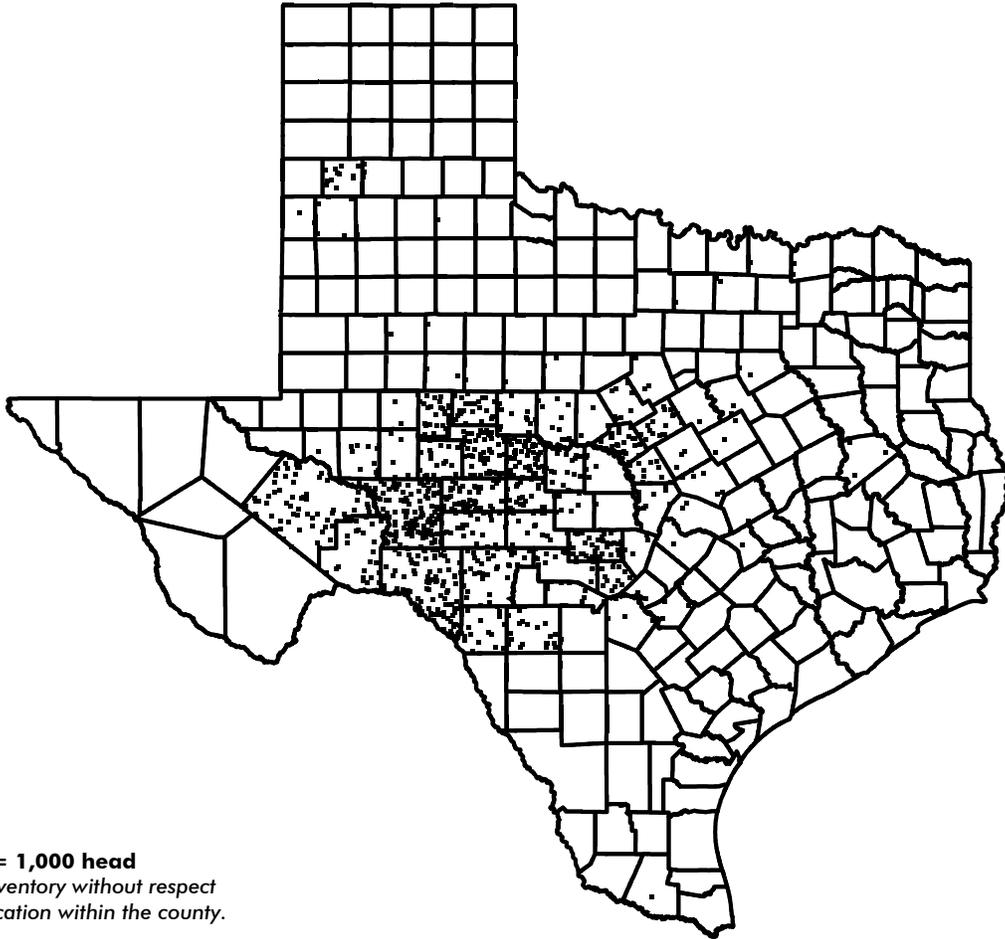

**TEXAS MANUFACTURED DAIRY PRODUCTS: Production of Specified Products, 2000-2004**

Product	2000	2001	2002	2003	2004
	<i>Thousand pounds</i>				
<b>COTTAGE CHEESE:</b>					
Curd <sup>1/</sup> .....	9,624	4/	15,366	16,638	18,532

<sup>1/</sup> Counties and districts with less than 1,000 all sheep and lambs in both 2004 and 2005 are not shown in the table, but their estimates are included in other counties, districts, other districts and states totals. <sup>2/</sup> Sheep and lambs shorn in both spring and fall are counted only once. Include fed sheep and lambs shorn. \* Estimates are not published for counties or districts having less than 1,000 head or where individual operations would be disclosed but their estimates are included in other counties, districts, other districts and state totals.

**TEXAS SHEEP AND LAMBS: Inventory, Lamb Crop and Disposition, 2000-2005 <sup>1/</sup>**

Year	On hand January 1	Lamb crop		Inship- ments of sheep and lambs	Marketings <sup>2/</sup>		Farm slaughter, sheep and lambs	Deaths	
		Number	Percent of January 1 ewes 1 year +		Sheep	Lambs		Sheep	Lambs
		<i>1,000 head</i>	<i>Percent</i>			<i>1,000 head</i>			
2000 .....	1,200	570	72	54	176	361	2	50	85
2001 .....	1,150	570	80	77	59	496	2	40	70
2002 .....	1,130	540	75	128	182	485	2	39	50
2003 .....	1,040	520	79	106	81	398	2	40	45
2004 .....	1,100	520	77	57	116	390	2	41	58
2005 .....	1,070								

<sup>1/</sup> Balance sheet estimates. Total of marketings, farm slaughter, deaths and sheep and lambs on hand end-of-the year equals total lamb crop, inshipments and on hand at the beginning of the year. <sup>2/</sup> Includes custom slaughter for use on farms where produced and state outshipments; excludes interfarm sales within the state.

**TEXAS SHEEP AND LAMBS: Inventory by Class and Value, January 1, 2001-2005**

Classes	2001	2002	2003	2004	2005
Breeding sheep and lambs .....	840	890	820	840	840
Ewes 1 year old and older .....	710	720	660	675	650
Rams 1 year old and older .....	35	40	40	45	45
Replacement lambs under 1 year old ...	95	130	120	120	145
Market sheep and lambs .....	310	240	220	260	230
All sheep and lambs .....	1,150	1,130	1,040	1,100	1,070
Value per head .....	80.00	78.00	79.00	96.00	105.00
Total value .....	92,000	88,140	82,160	105,600	112,350

**TEXAS WOOL: Production and Value, 2000-2004**

Item	2000	2001	2002	2003	2004
Sheep shorn <sup>1/</sup> .....	1,130	870	850	800	810
Weight per fleece .....	6.6	6.9	7.0	7.0	6.9
Total wool production .....	7,506	6,003	5,950	5,600	5,600
Price per pound .....	.49	.52	.68	.90	1.02
Total value .....	3,678	3,122	4,046	5,040	5,712

<sup>1/</sup> Includes shearing at commercial feed yards; sheep and lambs shorn both spring and fall are counted only once.

**TEXAS COMMERCIAL LIVESTOCK SLAUGHTER: Live Weight and Red Meat Production, 2000-2004**

Year	Total live weight <sup>1/</sup>				Total red meat production <sup>2/</sup>
	Cattle	Calves	Sheep and lambs	Hogs	
<i>1,000 pounds</i>					
2000	7,604,784	18,438	62,853	122,980	4,844,000
2001	7,515,759	8,869	61,749	118,070	4,780,800
2002	7,675,296	8,863	42,692	121,127	4,880,000
2003	7,671,294	12,424	48,998	114,550	4,845,400
2004	7,342,725	8,159	36,665	97,575	4,608,900

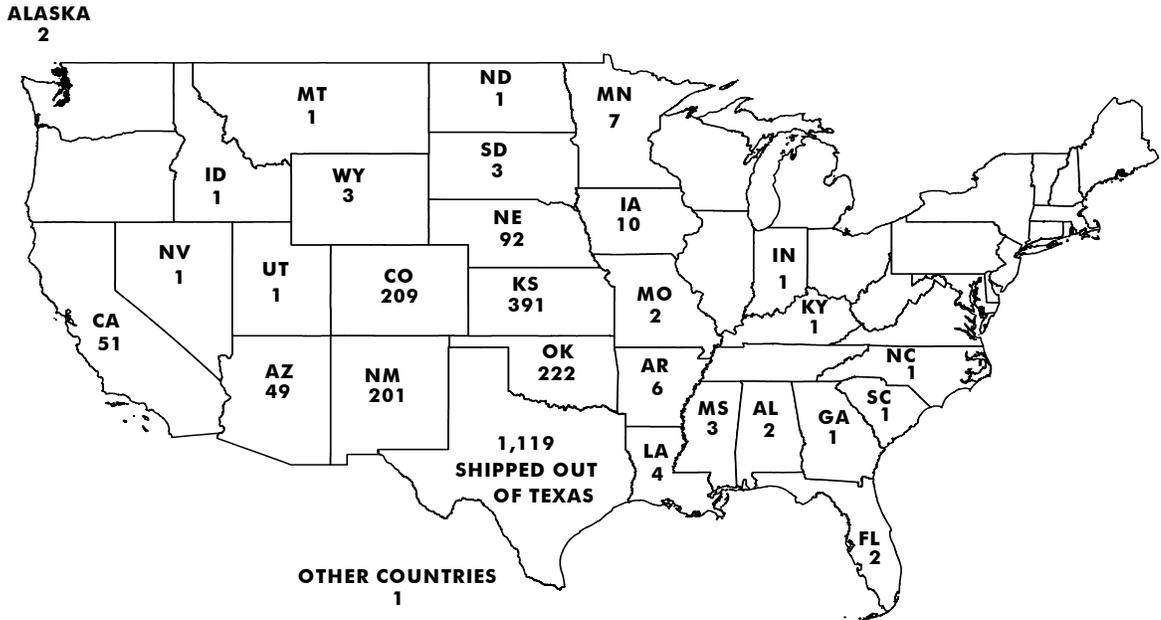

<sup>1/</sup> Includes slaughter in federally inspected and in other slaughter plants, but excludes animals slaughtered on farms. <sup>2/</sup> Includes total beef, veal, pork, lamb and mutton; excludes farm slaughter.

## CATTLE AND CALVES: Movement Out of and Into Texas on Health Certificates, 2004 <sup>1/</sup>

Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture/Animal and Plant Health Inspection Service/Veterinary Services (USDA/APHIS/VS) tabulate head counts from health certificates. These tabulations include truck and rail movements out of and into Texas. Under Texas law, all livestock must have a health certificate unless consigned to a state or federally inspected slaughtering establishment or specifically approved livestock market.

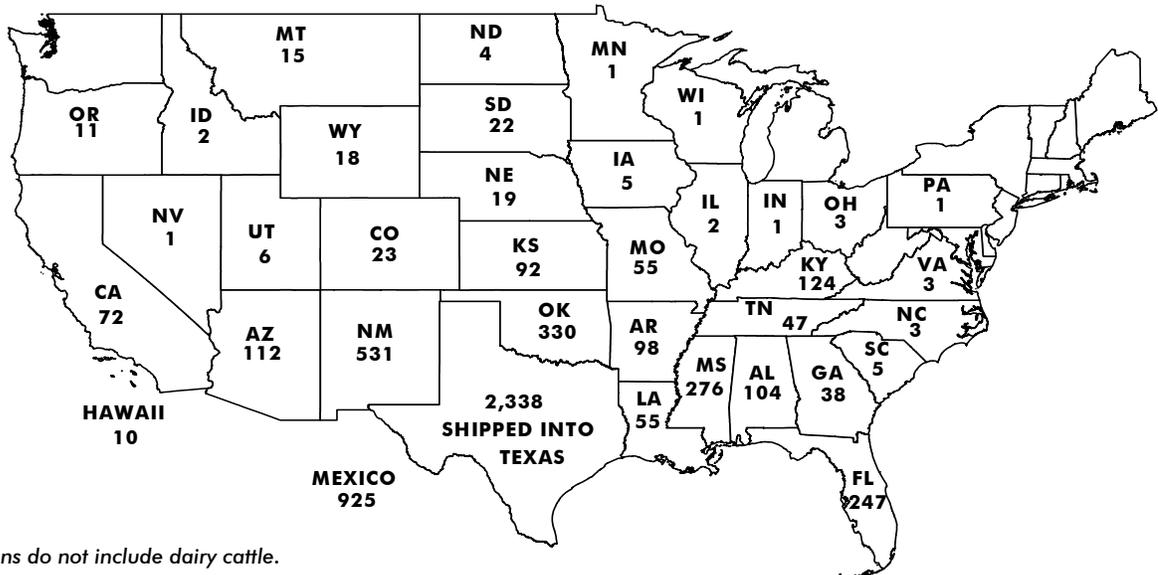

### OUTSHIPMENTS (1,000 Head)

Destination of cattle and calves as designated on health certificates tabulated by TAHC and USDA/APHIS/VS, 2004. Data include animals designated for slaughter and reflect movement to other states and countries, including Mexico. States receiving less than 500 head are not shown.

### INSHIPMENTS (1,000 Head)

Origin of cattle and calves as designated on health certificates tabulated by TAHC and USDA/APHIS/VS, 2004. Data exclude animals designated for slaughter and reflect movement from other states and countries, including Mexico. States sending less than 500 head are not shown.

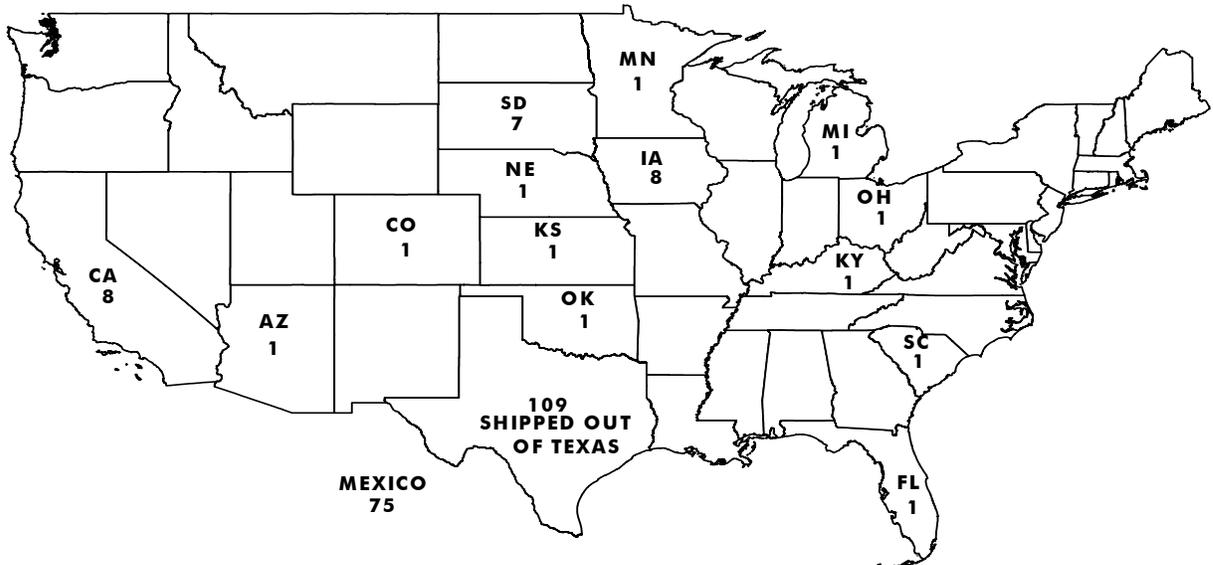

<sup>1/</sup> Cattle tabulations do not include dairy cattle.

## SHEEP AND LAMBS: Movement Out of and Into Texas on Health Certificates and Sheep Scabies Inspection Certificates, 2004

Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture/Animal and Plant Health Inspection Service/Veterinary Services (USDA/APHIS/VS) tabulate health certificates and sheep scabies inspection certificates. These tabulations include truck and rail movements out of and into Texas. Under Texas law, all livestock must have a health certificate unless consigned to a state or federally inspected slaughtering establishment or specifically approved auction market.

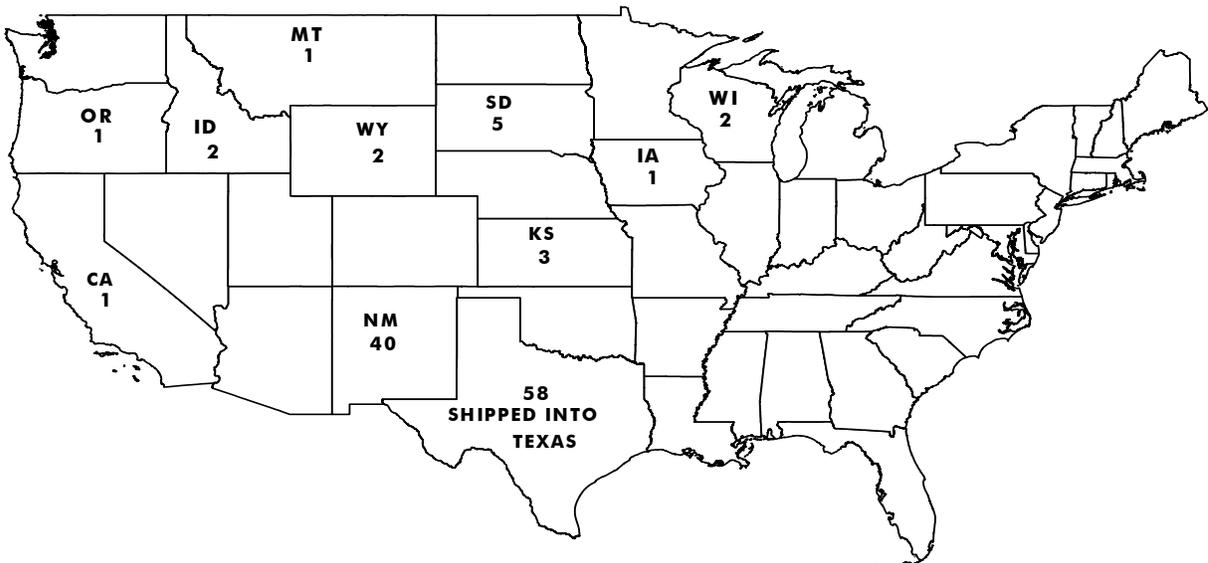

### OUTSHIPMENTS (1,000 Head)

Destination of sheep and lambs shipped out of Texas (truck and rail) as designated on health certificates or sheep scabies inspection certificates tabulated by TAHC and USDA/APHIS/VS, 2004. Data include animals designated for slaughter and reflect movement to other states and countries, including Mexico. States receiving less than 500 head are not shown.

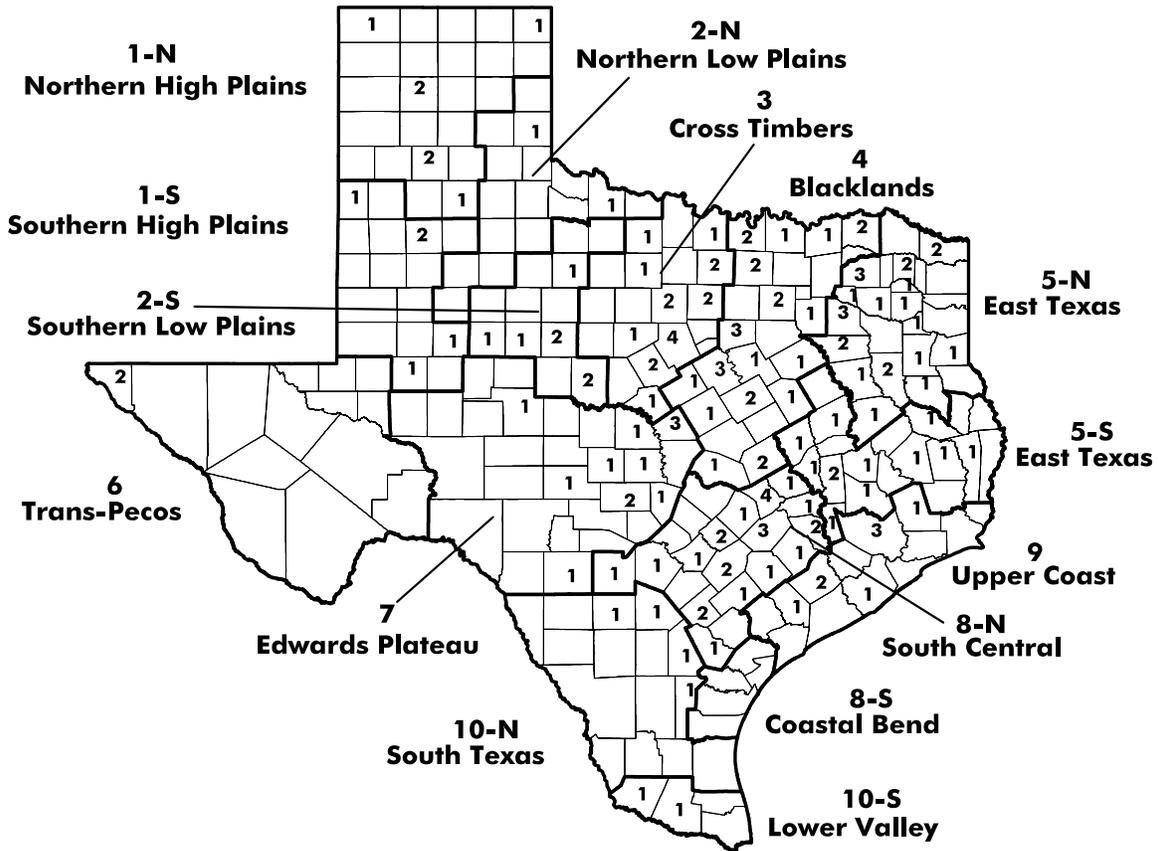

### INSHIPMENTS (1,000 Head)

Origin of sheep and lambs shipped into Texas (truck and rail) as designated on health certificates or sheep scabies inspection certificates tabulated by TAHC and USDA/APHIS/VS, 2004. Data exclude animals designated for slaughter and reflect movement from other states only. States sending less than 500 head are not shown.

## TEXAS LIVESTOCK AUCTION MARKETS

There are 157 state inspected livestock auctions in Texas. The map below shows the distribution of state inspected auctions as of December, 2004. Counts of livestock are taken from inspection receipts filed by auction inspectors of the Texas Animal Health Commission (TAHC). Monthly tabulations are available through the cooperation of the TAHC.

# Vegetables, Fruit and Pecans

# Texas Vegetable, Fruit and Pecan Summary

## Vegetables

Texas continued to be one of the five leading states in production of fresh market vegetables. In 2004, Texas ranked fifth in production, with 3.7 percent of the U.S. total, and fifth in value, accounting for 3.5 percent of the U.S. total. In 2004, Texas producers harvested 93,500 acres of commercial vegetables, down 9 percent from the year before. The value of production from this acreage and products totaled \$366 million, down 22 percent from 2003. Total production of all vegetable crops decreased 9 percent from 2003. Onions were the number one cash vegetable crop for Texas, watermelon was second followed by cabbage.

## Citrus

Texas grapefruit production for the 2004-2005 season totaled 6.6 million boxes, up 15.7 percent from last season. The 2004-2005 all orange production totaled 1.77 million boxes, up 7 percent from last season. Moisture supplies were adequate to almost surplus last fall as the fruit developed which insured a high quality and excellent fruit size. The better market conditions encouraged growers to pick more fruit for processing that may have been unpicked in previous years when economic conditions were not as favorable.

## Pecans

The 2004 Texas pecan crop was estimated at 40 million pounds, down 30 million pounds from the 2003 crop. Prices increased from the previous year, averaging 167.0 cents per pound. The 2004 year was a cyclical lighter production year and many producers were hit

hard with scab, flood and other weather even to that lowered the number of pecans harvested. Production of native varieties totaled 12 million pounds, down 21 million from the 33 million pounds produced in 2003. Production of improved varieties totaled 28 million pounds, down from 37 million pounds in 2003.

## Peaches

Texas utilized peach production for 2004 was estimated at 9,900 tons, up from 3,350 tons in 2003. The 2004 peach crop was hit with a late freeze causing the poorest crop producers have seen in at least 5 years. Utilized production is the total of peach sales for fresh market and processing, as well as peaches consumed on the farm. Total production for Texas peaches in 2004 was 12,200 tons.

## Grapes

Texas utilized 8,500 tons of grapes for wine production. Production increased 46.5 percent from the 5,800 tons produced in 2003. An estimated 2,900 bearing acres were available for harvest. Yield averaged 3.0 tons per acre, up from 2.1 tons from the previous season. The total estimated value of the 2004 crop was \$7.8 million with an average value per ton of \$919. Texas vineyards were forced to dodge heavy rain during the last couple of months of the growing season and into harvest and crush. Large vineyards in the South Plains area were able to avoid damage from these storms for the post part. There was not as much hail this year unlike previous years. Smaller vineyards, especially in the Hill Country, suffered from root rot and other fungi problems due to the excess rain.
